

Medical Elizabeth

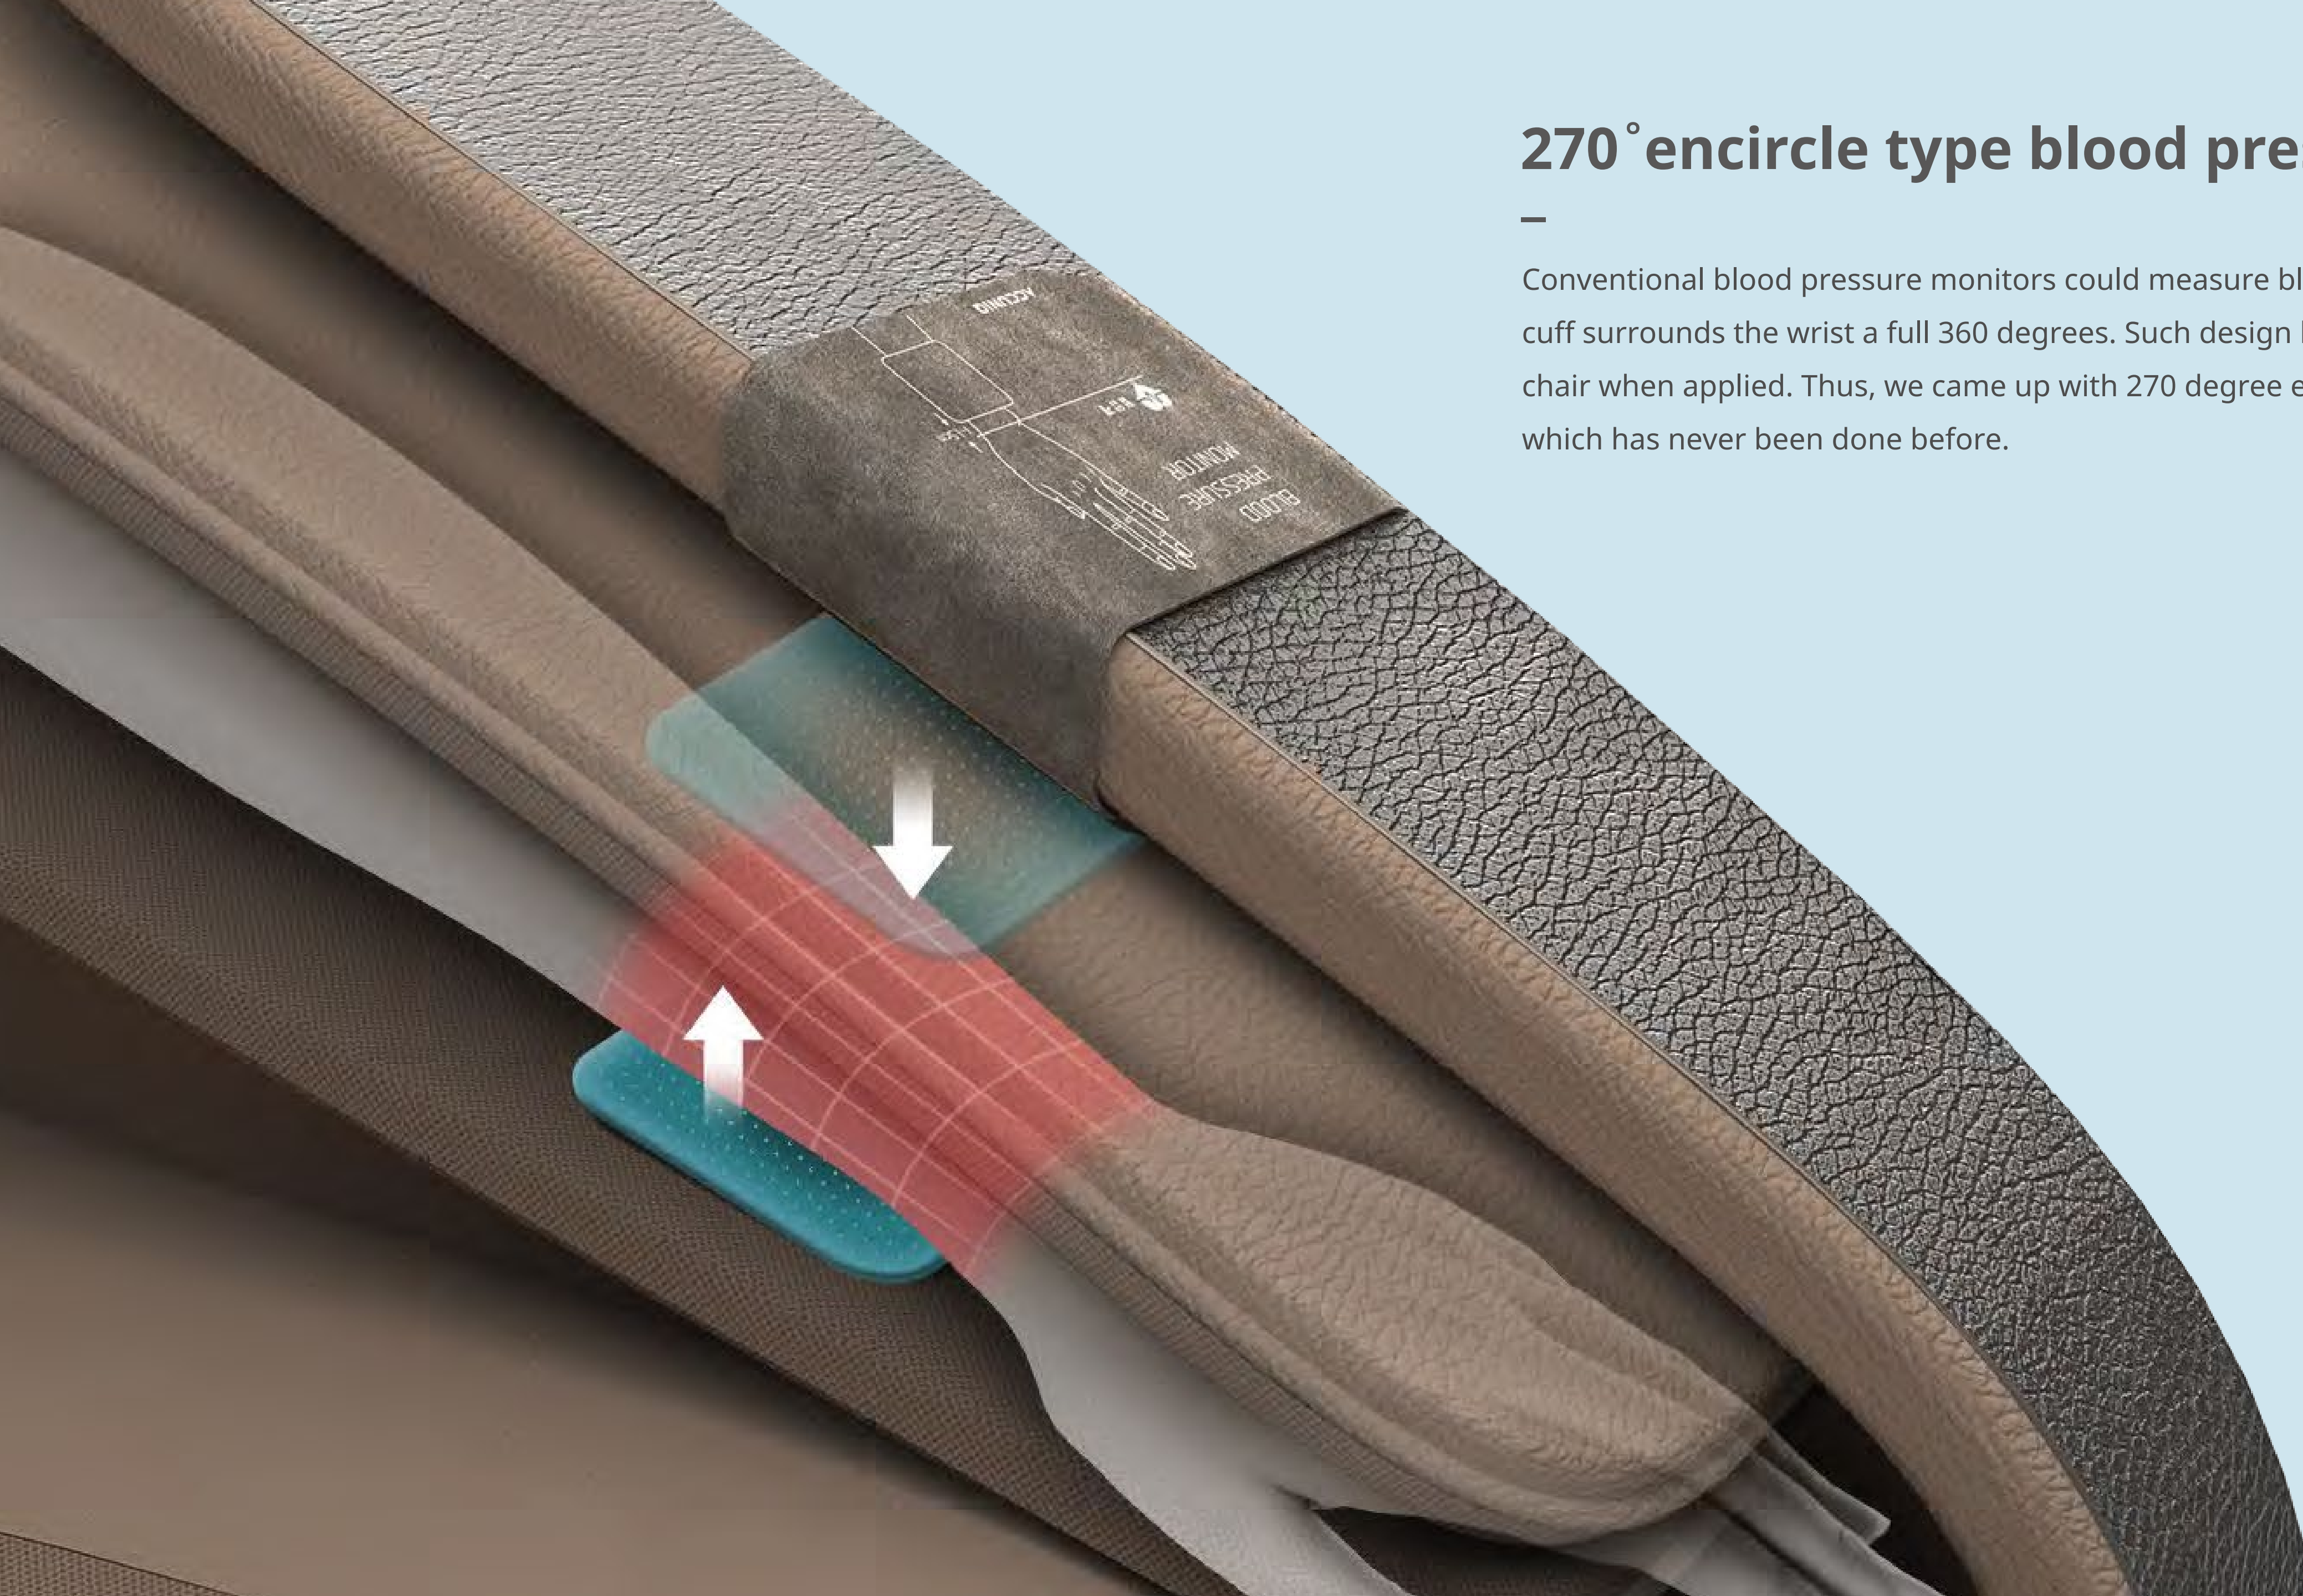

Introducing Bodyfriend's second medical device.
A product that allows you to measure & manage
blood pressure while receiving massage.

 **BODYFRIEND**

270° encircle type blood pressure monitor

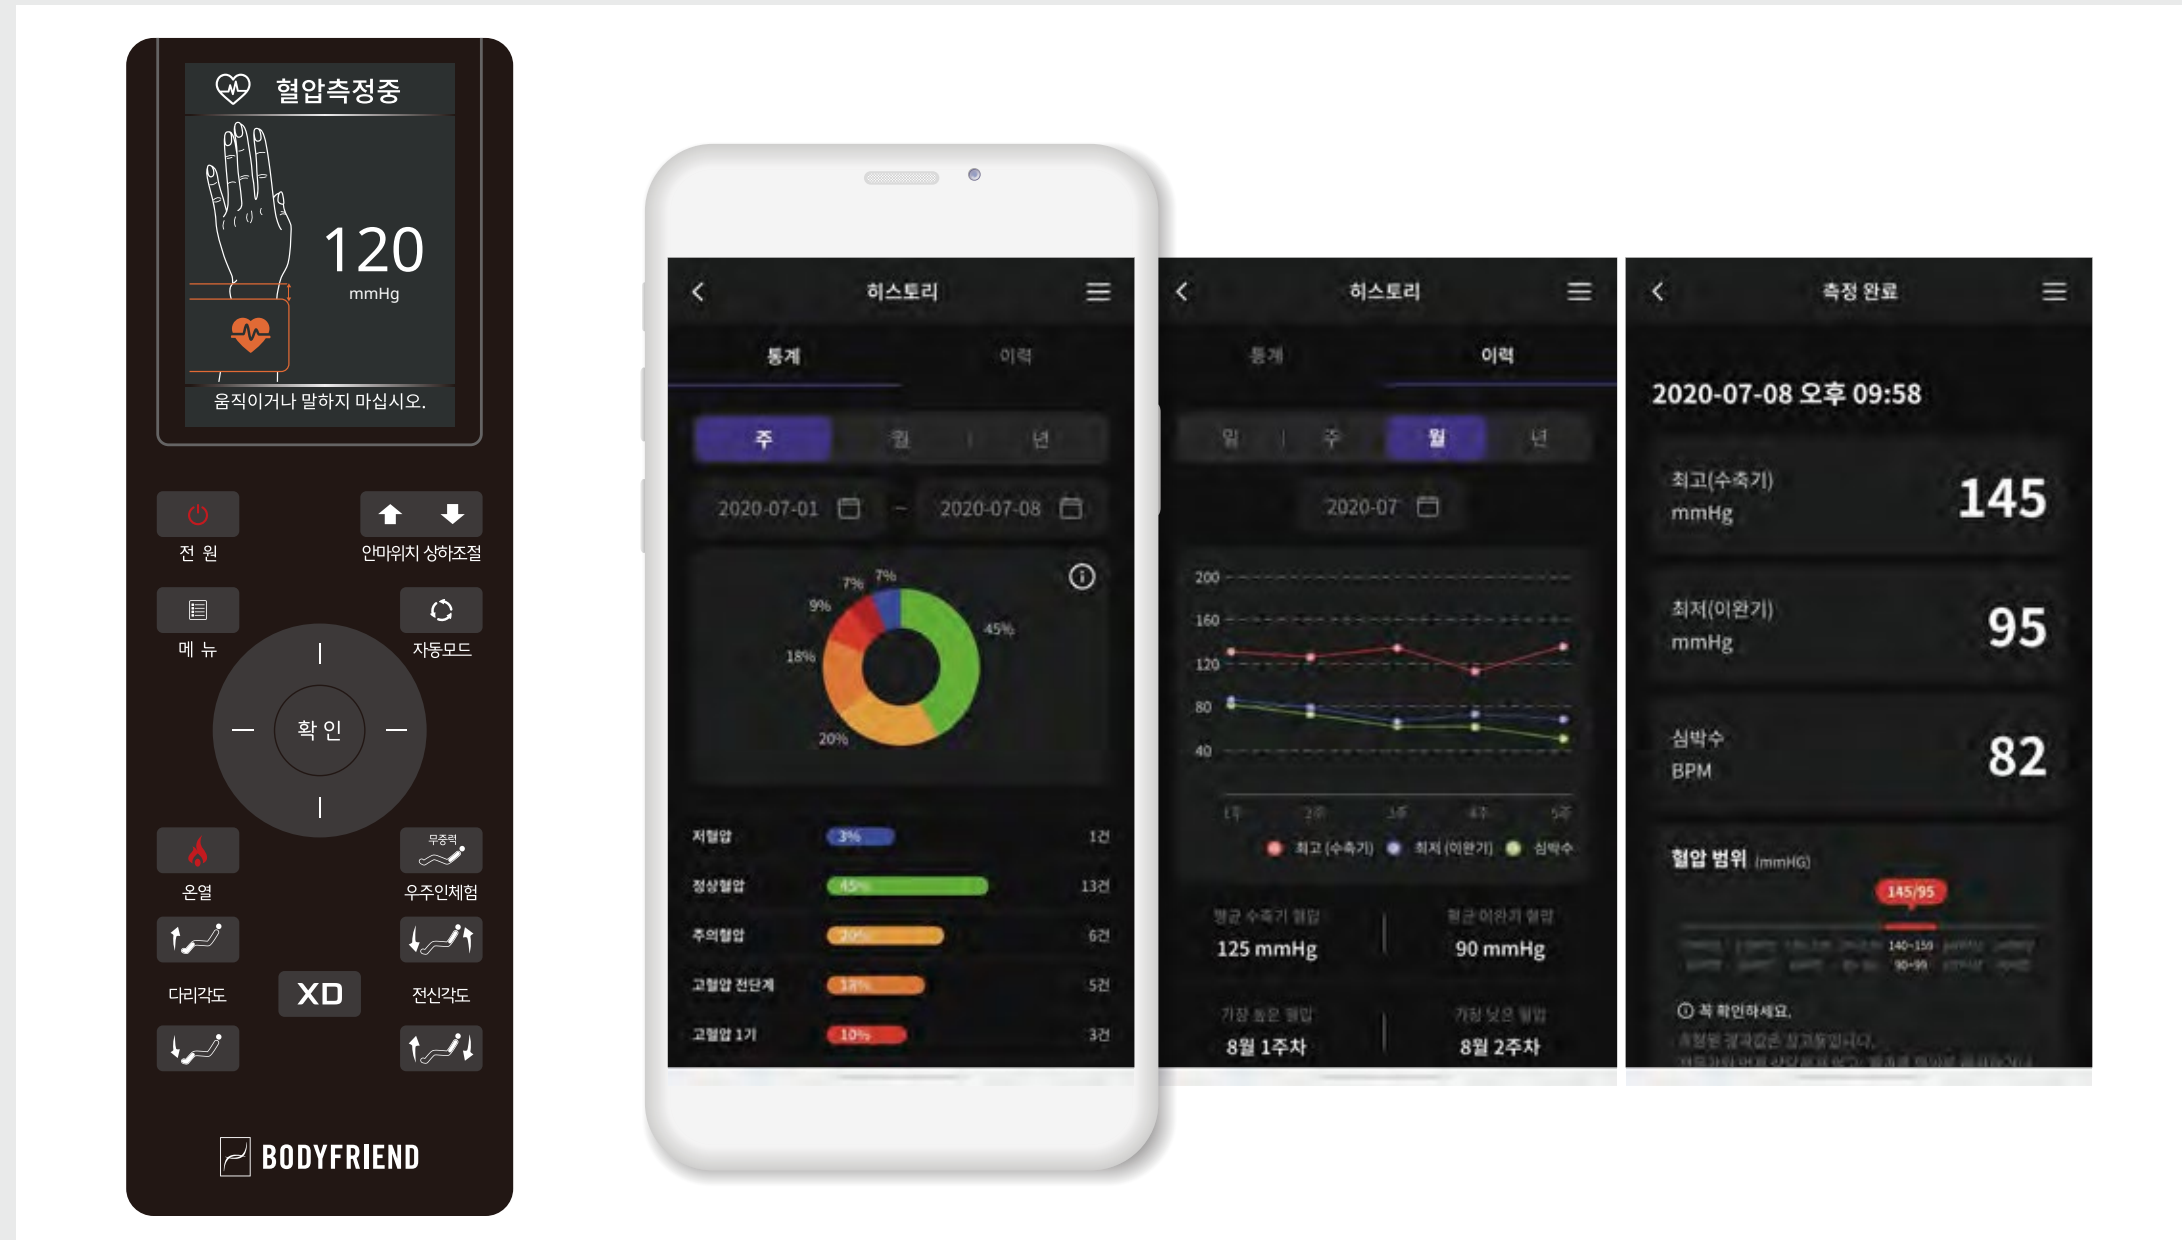

Conventional blood pressure monitors could measure blood pressure only when the cuff surrounds the wrist a full 360 degrees. Such design harms the usability of massage chair when applied. Thus, we came up with 270 degree encircle type BP monitor which has never been done before.

Blood pressure treatment massage

Elizabeth medical is an integrated hardware/software platform that manages health data based on accurate blood pressure measurement. Massage basically activates the parasympathetic nerve, and in addition to this, Elizabeth Medical helps user to control the breathing through the attached speaker with sounds designed to control inhalation/exhalation ratio. These allows the user to directly experience the change in blood pressure value.

Blood pressure management through App

Elizabeth Medical also calculates the likelihood of cardio-cerebrovascular disease such as heart age and stroke based on the measured blood pressure value through the healthcare application systematically combined.

Product Name

ELIZABETH Medical

Length

59 inch

Width

30 inch

Height

45 inch

Weight

280 lbs

Reclining Angle

115 to 150 degrees

Lower Body Angle

0 to 90 degrees

Power Supply

AC 110~220V

Rated Current

160W

Power Frequency

50~60Hz
