

Company name	Shin Jeung Mach.Co.,Ltd
Address	71,Gukgasandan-daero 28-gil, Guji-myeon,Dalseong-gun,Daegu
CEO	Oh Seong Hyeon
Tell(company)	+82) 53-617-2332
Website	www.sjvco.co.kr
E-mail(company)	Sjvco1@hanmail.net
Main product	Valves, Pumps, Equipment for Waterworks(Rotary Screen, movable weir) and Sluice gate
License & Certification	EPC, ISO 9001, ISO 14001, ISO 45001, CE, KS, NET, EP

World Top Technology

Shin Jeung Mach. Co., Ltd(SJM) has been producing various valves used in water supply and drainage facilities to provide clean water and build the safe environment. Most of the equipment used in water supply and drainage facilities were imported, we succeeded in developing butterfly valves and sluice valves with in-house technology to lay the groundwork for the valve industry in Korea and requested the government authorities to establish the KS (Korean Industrial Standards) for valves and pip-es, making contributions to the standardization of water facilities.

Shin Jeung Mach. Co., Ltd.(SJM) Controls quality by all parts measure-ment(from entering of materias) at each detail process completion for stable supplying to customers.

Product Introduction

Butterfly valve with a sheet device that may maintain a watertight state applied with pressure balancing technology and integrated body.

* Model SJ020M-R1G4 and 3,503 others

Rotary screen specified by New Excellent Technology(NET) has been applied with Lake Individual Rotator device and movable front screen.

* 2,000mm(W) 3,700mm(H) and 3,259others
