

Company name	DH WATER
Address	45, Gukgasandan-daero 28-gil, Guji-myeon, Dalseong-gun, Daegu, Republic of Korea
CEO	SANG UOOK MOON
Tell(company)	None
Website	http://www.daehanwater.kr/
E-mail(company)	dhw2000@daehanwater.co.kr
Main product	Water Treatment System
License & Certification	ISO9001, ISO 14001, CE RO Series(VM1093-008-I-01), CE SS Series(1S180911)

We are water treatment company using reverse osmosis such as seawater desalination, purification, waste water reuse and solar purification system.

We can provide customized RO Plant and Portable caravan & solar cube purification devices.

And we provide one-stop-service (trial run, manufacture, delivery, maintenance..etc).

Product Introduction

RO System :

It effectively removes organic matter particles and bacteria that are difficult to remove with the existing water treatment method.

Drinking water can be obtained by removing salt from seawater that is difficult to use as domestic or industrial water.

It can also be manufactured in a portable container type and can be up to 500 Ton/day per container.

Solar Cube purification device :

The solar cube type water purification device is a self-powered water purification device that meets the government's low-carbon policy.

It generates electricity through solar panels and has an internal water purification system to minimize contact with the external environment.

Eliminates need for electricity as it uses solar power Easy operation and control

Eco-friendly water purification without use of chemicals Minimal space constraints

Solar cube is a versatile water purification device that can be applied to groundwater, brackish water, and seawater by efficiently controlling the pump through an inverter.
